

AI Engineering Manager with hands-on experience building production AI/ML systems, leading a Data Science team through applied research, LLM engineering, and scalable software development for automation of complex workflows in the mortgage and title industry.

SKILLS

Programming	Python, SQL, JavaScript
AI / ML	PyTorch, scikit-learn, Pandas, Transformers, spaCy, Presidio, XGBoost, LightGBM
GenAI / Agents	Azure OpenAI, LLMs, evals, RAG, fine-tuning, LiteLLM, CrewAI, Agents SDK, Deepgram
Cloud / Data	Azure, AKS, AWS, Docker, Terraform, Azure Document Intelligence, PostgreSQL, Cosmos DB, LiveKit

EXPERIENCE

ServiceLink, a Fidelity National Financial company	October 2023 — Present
AI Engineering Manager	Dallas, TX June 2026 — Present

- Leading a team of 5 data scientists and engineers building production AI services on Azure/AKS, including agentic workflows, Python microservices, LLM applications, and machine learning systems.
- Drove GPT-4 to GPT-5 class model migration, building automated evaluation pipelines that benchmarked quality, latency, and cost to achieve a 90% reduction in token spend, while verifying output quality improvements against baseline.
- Established AI engineering standards that reduced production incidents through testing frameworks, API documentation, observability practices, code quality metrics, and deployment best practices.
- Created and managed the team's hiring pipeline, designing interview processes and leading the hiring of 5 new team members across data science and AI engineering roles.
- Actively driving the next-generation EXOS platform architecture, migrating to PostgreSQL, Microsoft Agent Framework, and Agents SDK with Temporal-based durable state management for resilient, long-running agentic workflows.

AI Engineer II	September 2025 — June 2026
----------------	----------------------------

- Architected and deployed production multi-agent underwriting automation systems using CrewAI and LLM orchestration patterns, reducing processing cost per order from \$8 to under \$2 while increasing workflow reliability and achieving 97%+ acceptance rate.
- Developed compliance-focused PII detection and redaction pipelines integrating Presidio, Azure Document Intelligence, and Gemma 4 for sensitive document processing.
- Built a LiveKit-based AI voice agent framework for automated outbound appointment scheduling, with modular STT/LLM/TTS pipelines and an MCP server exposing agent actions as callable tools.

Data Scientist	October 2023 — September 2025
----------------	-------------------------------

- Designed and developed a large-scale document extraction system combining OCR, heading detection, and LLMs to extract structured data from unstructured documents, processing 10M+ pages daily.
- Led development of machine learning models for risk scoring and optimal pricing of auctioned properties, improving property sell-through performance.

Graduate Researcher / Computer Science Department	November 2021 — July 2022
Technical University of Madrid	Madrid, Spain

- Built internet-measurement and graph-analysis pipelines for webpage-owner identification, enterprise-network discovery, and IP geolocation using DNS routing, privacy-policy scraping, Crunchbase, NetworkX, Plotly, and multi-node measurements.

Software Developer Intern	April 2019 — February 2020
Indra	Madrid, Spain

- Developed a Python-based radar-emitter simulator with Keras neural networks to model aircraft radar emissions.

EDUCATION

Master of Artificial Intelligence, Illinois Institute of Technology	2023
---	------

- Yield Engagement Mentor (on-campus job): coached 10+ new students to have a successful academic trajectory at Illinois Tech.
- Connect Our Research Scholarship recipient: led a coordinated project between IIT (Chicago) and UPM (Madrid) researching bias and fairness of machine learning models, resulted in a Master thesis and an accepted paper in ICML 2023.

Master of Telecommunication Engineering, Technical University of Madrid	2023
---	------

Bachelor of Telecommunication Engineering, Technical University of Madrid	2021
---	------

AWARDS, TALKS & RECOGNITION

Q3 Champion Award Winner, ServiceLink, recognized as 1 of 4 employees across a 1200+ workforce	2024
ICML 2023 poster presenter in the LatinXAI Workshop	2023
SECRYPT 2022 poster presenter in the main conference	2022
Euro S&P 2022 research speaker in the IWPE Workshop; Best Presentation award	2022
